Heavenly Touch

CONCRETE POLISHING | NATURAL STONE RESTORATION

CONSUMMATE PROFESSIONALISM IS OUR FOUNDATION...

Heavenly Touch Stone Care offers specialty decorative concrete SERVICES including concrete polishing AND epoxy coatings since 1995. We serve residential and commercial clients throughout the San Jose, Silicon Valley metro area with expert polishing, repair, and decorative treatments for concrete and natural stone floors.

We have decades of experience in the industry and have repaired, restored, and polished tens of millions of square feet of flooring. New construction concrete and even drab-looking existing concrete can look clean, elegant, and welcoming with our polishing, staining, and other decorative concrete services. Epoxy coatings are a game changer. We'd love to show you what we can do. Your natural stone-- marble, travertine, granite, limestone, and more-- will look as good as new -- or better -- in our hands.

Customer satisfaction is incredibly important to us. After all, our reputation depends upon it. That's why we stand by our work and refuse to be satisfied until you are. We are fully licensed and insured, and look forward to serving you.

CONCRETE POLISHING

Polished Concrete is a Cost-Effective and Attractive Flooring Solution.

Since most modern structures are built on a concrete slab, the stage is already set for a durable, abrasive-resistant, and potentially stunning final surface, without the need for expensive installation costs and additional materials.

Heavenly Touch Stone Care is the leading provider of concrete polishing services throughout the San Jose, Silicon Valley area. Our experienced technicians will prepare your existing concrete surface with diamond-embedded pads and a chemical densifier, then stain, polish and finish according to your specifications.

CONCRETE STAINS AND DYES

Achieve Incredible Outcomes with Concrete Stains and Dyes

There are a variety of stains and dyes which can be applied, re-applied or incorporated into concrete surfaces to enhance or restore the appearance of your flooring. Color is achieved by using dry shakes or color hardeners, powder or liquid releases, integral colors or acid stains. All these products may be combined to create even more intricate designs. Top it off with polishing and the results can be both durable and strikingly beautiful, and a wide range of looks can be achieved.

EPOXY COATINGS

Don't Paint Your Garage Floor!

Epoxy coatings and polyaspartic top coat flooring installations provide a long-lasting, non-porous solution for new or existing concrete floors. Residential concrete garage floors, as well as concrete in industrial environments can be exposed to heavy traffic, harsh chemicals, and extreme temperatures.

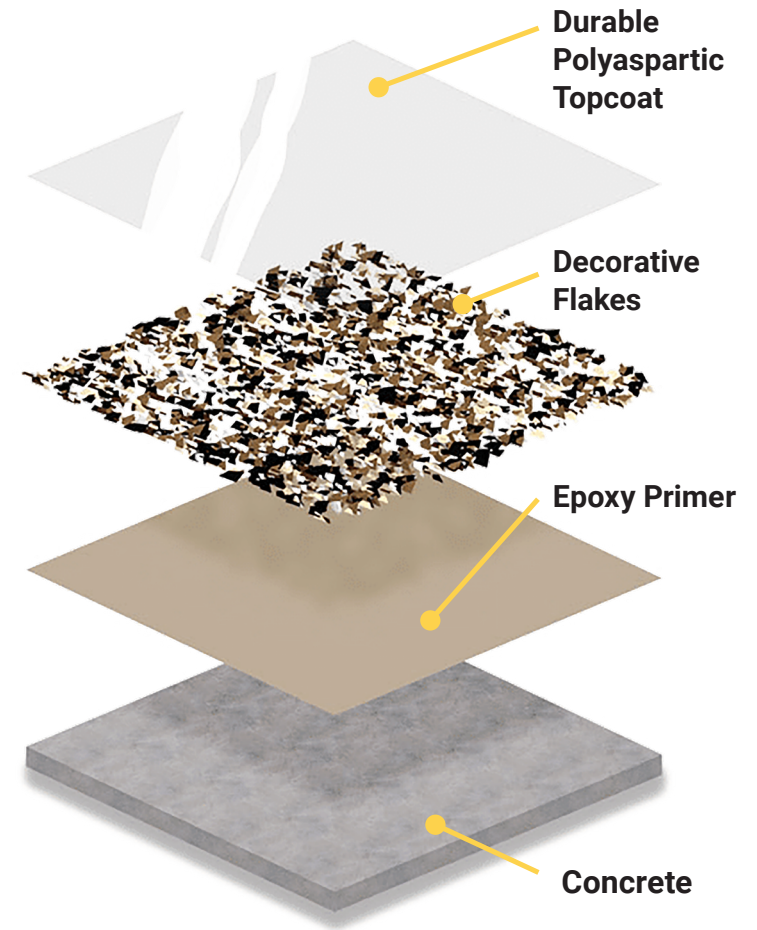

We can install epoxy on prepared concrete and finish with a top coat for added protection, utilizing the best technologies and products available. Don't let the beautiful appearance of epoxy fool you. It is durable enough to withstand the test of time.

Fast, Yet Lasting Results

Heavenly Touch Stone Care specializes in epoxy garage floor installation. We have a loyal customer base in the San Jose and Silicon Valley, California area who were thrilled to get a customized, lasting finish for their concrete in just one day's time.

Epoxy offers many advantages over traditional concrete flooring options, such as durability and a remarkable finish that will not discolor, dull or fade. The greatest advantage, though, is that our stunning, heavy-duty epoxy flooring requires minimal maintenance. In fact, we provide a *10-year no-peel guarantee.

Epoxy flooring is tried and true. That's why it is the number one product for industrial, commercial and residential garage floor applications.

WHY CHOOSE US?

Heavenly Touch Stone Care offers a completely exclusive garage floor coating system that is superior to the epoxy coatings of the past. The comparison list below illustrates some of the elements that make Heavenly Touch “the” Garage Floor Coating authority.

	HEAVENLY TOUCH	MOST EPOXY COMPETITORS
Technology	Hybrid-Polymer Based Today's technology designed for residential/commercial applications.	Solvent Based 50+ year old technology.
Components	No harmful Volatile Organic Compounds (VOC's) and low odor means the Heavenly Touch process is harmless to your family, pets and the environment.	Hazardous material with very harsh odors, flammable, not legal in all 50 states.
Life Span	100% UV Protection/No Oxidation. Surface will look as good in 5 years as the day it was installed.	0% UV Protection, will fade & discolor due to our climate. Epoxy will amber/yellow out with direct exposure.
Cure Time	Cures completely solid in just 36 hours after final application.*	Total cure time after final application is 3-5 days.
Finish	Cures 2 times harder than Epoxy, (Higher impact & abrasion resistance). Unaffected by hot tires.	Softer material than a hybrid-polymer when cured. Expanded pores allow tire peel up.
Proprietary Product	This Hybrid-Polymer System is provided exclusively by Heavenly Touch Stone Care.	Numerous manufacturers provide inconsistent quality materials. Can be applied by any paint contractor. (Not exclusive to anyone).
Guarantee	Heavenly Touch has the experience and confidence to guarantee each garage floor system against workmanship and material defect – and we put it in writing!	Most warranties are 1 year with some being 5 years at most with a long list of exclusions.

*When average temps are above 50F typical cure time is 24 hours

FREQUENTLY ASKED QUESTIONS

1) What type of coating systems do you use? Most companies just use Epoxy, don't they?

Heavenly Touch uses the hybrid system. 100 percent solids epoxy for our base coat which acts as vapor barrier withholding up to 8 lbs. of moisture and finished with 100 percent solids Poly Aspartic Poly Urea for an unapparelled floor with structural integrity that is 100 percent UV stable unlike epoxy that ambers/yellows with direct sun exposure

2) How will you prepare the floor before coating it?

Regardless of age, ALL floors are profiled . We prepare the concrete to be coated by grinding the surface. There is NO better way and should be the ONLY way that a floor is properly prepared for a coating.

3) I have some small cracks in my floor. What will be done with these?

All open cracks and holes/divots will be prepared for a smooth surface to work with. Expansion joints, steps and stem walls will incur additional charges, inquire within.

4) How long does the entire process take, and when can I put my car back in the garage?

Our system can be installed in as little as one day. You can park in your garage and have full use of it just 24 hours later. When the mean temperature falls below 50 degrees, cars and heavy objects MUST be kept off the floor for a minimum of 2 days as the curing process will be slower.

Continued>

5) My garage is full of stuff. What do we do with it while the floor is being coated?

It is the homeowners' responsibility to remove all possessions from the garage. Typically, we recommend that your items be stored as much as possible inside the home, however in most cases the best location becomes a covered patio or side yard.

6) I've heard polyurethane is flammable. And what about the smell?

Heavenly Touch's system is all low VOC and free of solvents, they are non flammable and non hazardous to people and the environment.

7) What is the best method to clean my new floor?

We recommend 6 oz of ammonia be mixed with 1-2 gallons of water in a mop bucket, wrung out and the floor mopped with a string style 100% cotton mop. Special Note: We highly recommend against the use of any soap based product as soap will leave a film residue that dulls the sheen and will attract more dirt and debris if not rinsed adequately.

8) What is the Warranty?

ALL our residential Poly Aspartic epoxy flaked systems come with our LIFETIME guarantee which will be provided to you upon satisfactory completion of your project. Commercial installations are warranted for a maximum of 3 years.

WORKING WITH US

At Heavenly Touch we not only know what it takes to make your floors and surfaces look great and meet the unique demands of your home or facility, rest assured that we are accustomed to working where there are family members, employees, guests or patrons and will work with you to minimize inconvenience to them.

And when the job is done your property will be left in spotless condition. We are also careful to dispose of waste products according to EPA and other environmental requirements.

Contact us to discuss your unique floor and surface care needs. No matter how demanding, we're up to the challenge.

“

Delivered exactly as promised. Punctual and professional. I highly recommend their services and will use them again on future projects. -- Andreia Girardi, San Jose, CA
